PROFESSIONAL SUMMARY

Technical Operations Manager at Presto, Libya's leading e-commerce and delivery platform, with a BSc in Computer Science and about six years of experience in IT support, ERP (Odoo) operations and operational controls. Responsible for IT general controls in practice: user access and roles, change and release testing, incident response, and data integrity between systems. Also builds internal tools on the Odoo API (B2B supplier dashboard, KPI dashboards, Python automation). Experienced in reconciling system data with source records and documenting evidence for every finding.

CORE COMPETENCIES

- **IT general controls:** user access and roles, segregation of duties, approval workflows (Odoo 16 / 19)
- **Change management:** staging-before-production testing, release verification
- **Incident management and system support:** response-time targets, temporary workarounds, root-cause follow-up
- **Data integrity and reconciliation:** cross-system matching, variance analysis, SQL, Excel, Metabase
- **Systems development:** Odoo API / RPC integrations, Python automation, dashboard development (Odoo, Metabase)
- **Documentation and reporting:** evidence files, process documentation, KPI definitions, management dashboards
- **Inventory and procurement controls:** stock counts, goods-receipt matching to purchase orders, replenishment planning
- **Communication and coordination:** cross-functional work with development, finance, marketing and operations; supplier and customer communication; user training and written guides
- **Team leadership:** led warehouse staff and workflows; supervised daily sales and helpdesk operations

EDUCATION

Bachelor's Degree in Computer Science | Al-Rifaq University, Libya | Graduated Feb 2023

LANGUAGES

Arabic (native) | English (professional working proficiency)

PROFESSIONAL EXPERIENCE

Technical Operations Manager, Grocery Division | Bakr for E-Commerce & Delivery (Presto) Jun 2026 to Present

Promoted from Category Supervisor.

- Act as the technical bridge between the grocery division and the development team: turn operational needs into clear specifications, then verify that what is delivered matches the intended outcome.
- Own Odoo and the connected apps end to end for nine branches and warehouses: the customer and courier apps, the supplier dashboard and the Presto Panel.
- First point of contact for incidents, with response-time targets measured in minutes: keep operations running with a temporary workaround until the root cause is fixed.
- Test every change on staging before production and sign off releases.
- Reconcile orders, invoices and stock between Odoo and the app, tracing each mismatch to its cause.
- Govern user roles and permissions, and review bulk updates to items, prices and quantities before they are applied.
- Prepare Odoo and the connected apps for new branches and warehouses, and review data migration and import files before approval.
- Build internal tools on the Odoo API and Python, and own the Metabase dashboards management uses daily.
- Work with the external Odoo partner: request changes and fixes, review and test their solutions before sign-off, and follow support, upgrades and post-go-live issues with them.
- Define the KPI framework for the operations plan, and run user training and written guides to cut user errors.

Category Supervisor | Bakr for E-Commerce & Delivery (Presto) Mar 2024 to Jun 2026

- Ran grocery categories with thousands of items across the branches, and met the sales targets set for them.
- Planned stock and reorders in Odoo and Excel from stock cover and sales history, and matched goods receipts to purchase orders.
- Tracked sales, velocity, availability and slow-moving stock by category, item and branch, and adjusted the range and replenishment to match.
- Set prices against cost and competitors, kept branch price lists current, and used pricing, promotions and availability to grow category sales.
- Coordinated suppliers day to day and helped launch new supply partnerships.
- Monitored stock across sub-warehouses, planned weekly distribution with marketing and operations, and prepared purchasing, restock and shortage reports for HQ and branches.
- Assigned in 2025 to raise sales and service quality at the Benghazi branch warehouse.
- Supported the move from Odoo 16 to Odoo 19, checking stock and order data around the cutover.

Warehouse Manager | Al-Zaitoune Al-Bayda Co. Mar 2023 to Feb 2024

- Ran the raw materials warehouse that feeds the factory: receiving, storage, dispatch to production and stock reconciliation.
- Ran weekly and monthly stock counts, and kept expiry dates under control with first expired, first out.
- Kept stock records and item classification accurate, and worked with purchasing and production to keep stock at the right level and avoid shortages.
- Led the warehouse team and the day-to-day workflow.

Sales Helpdesk Officer | Lion Star Company Jan 2020 to Dec 2021

- Supported the ERP and sales system across the company's sales centres, resolving system issues for staff and customers and shortening response times.
- Supervised daily sales operations and made sure financial closing was done accurately.
- Supported sales initiatives and day-to-day performance at the sales centres.

Technical Support Specialist | Al-Meddad Company Sep 2019 to Dec 2019

- Installed and configured the company's ERP and accounting system on client machines and got it running on site.
- Trained client staff on the system and supported them day to day.
- Collected client change requests, clarified them and passed them to the development team.
- Provided technical support when clients hit problems, diagnosing and fixing software issues to reduce downtime.
